ROZANNE BELL

NEW ORIGINAL COLLECTION

THE NEW NAUTICAL  
COLLECTION FROM

# ROZANNE BELL

A captivating new range of original works by Zimbabwean born Landscape artist Rozanne Bell. Roz is known as an abstract "visualiser" among her artistic patriots and critics and has always been fascinated by the use of colour and texture, she says: "I am inspired by the splendour of the natural environment and particularly wanted to focus on capturing the beauty of the the british coastline. By capturing the magnificence of light, I try to visualise a moment in time where my viewers would feel as if they are in the painting itself."

Known for her diverse and unique technique of painting in which he paints on to textured surfaces that are encapsulated in resins ,Roz says she is on a never ending learning curve. The medium of the "Nautica" collection enables her to achieve a much wider gradient and colour spectrum with exploration of surface and adhesion, than in her more well known harbour pieces. In turn, her fascination for natural world along with her love for nature are brought to life in her striking new works. Rozanne is hugely Inspired by her surroundings and of course the love of flowers and gin!
